

Qubist

Environmental Advice and Management Capability

Providing clients with dependable environmental planning and management advice

Qubist Pty Ltd is an advisory business that provides expertise to clients with infrastructure and utility assets. We help clients create greater value, new possibilities and superior outcomes for their assets and organisations.

Qubist provides solutions across the entire project lifecycle. We understand the specific challenges involved in running an organisation and call upon decades of industry experience to assist our clients – ensuring strategic, practical, and commercially orientated results.

Our clients include private and public sectors, Government agencies, contractors, and legal organisations.

Qubist Environmental Advice and Management

Qubist's Environmental Advisory Team is experienced in providing environmental planning and management advice at all stages of the project lifecycle.

Our team are experienced in:

- Environmental management, planning, approval, and commercial advice;
- Preparation of environmental documentation, including environmental management plans and compliance reporting;
- Critical and technical review of environmental documentation, including environmental impact statements and associated documentation, to ensure accuracy, detail and correct client messaging;
- Management of environmental assessments;
- On-site environmental advice, management and compliance during the project delivery phase;
- Urban design management;
- Infrastructure sustainability advice;
- Government agency liaison and consultation; and
- Community consultation and engagement.

Qubist's Approach

Our approach to environmental management is developed from industry experience and understanding client, contractor, Government, community, and other relevant stakeholders' objectives. We develop and leverage tailored solutions, to ensure delivery of improved project outcomes.

We assist clients with environmental management, planning, assessments, and compliance, enabling them to meet their statutory obligations while minimising impacts on the environment and the community.

Our team have excellent interpersonal skills and written communication skills, to understand our clients' requirements and translate those requirements into clear outcomes and documentation. We are collaborative thinkers, and thrive working in high-paced, dynamic, and challenging environments. We work to tight timeframes driven by planning, construction and operational programs.
